Tiny But Mighty

UNINET®
DTF™ 100

UNINET®'s A3+ portable ink-based direct-to-film digital transfer printer was developed for the short-volume production of high-quality full-color print transfers for the apparel decorating market.

The ideal on-demand starter DTF printer.

The **UNINET® DTF™ 100** is a tiny but mighty direct-to-film digital transfer printer, capable of creating **A3+ up to 13" x 19" wide** high-quality image cut sheet prints. It is the most affordable and adaptable way to quickly print on-demand high-quality DTF transfers at home without taking up a lot of room.

Material Versatility.

This device is precisely configured for manual DTF powder application and capable of generating basic or complicated, colorful weedless digital transfers in a single pass. Allows you to print on light and dark-colored fabrics and use an almost **unlimited variety of materials**, including cotton, polyester, nylon, canvas, blends, and much more!

High-Resolution Printing and White Overprint® capabilities.

The UNINET® DTF™ 100 printing system has a high-definition, professional inkjet printhead with a wide color gamut for crisp, stunning print output. It also incorporates a technology that automatically lays down a combination of CMYK colors and **white overprint® capabilities** to exponentially produce professional-quality and sharp prints in one pass.

The UNINET® DTF™ 100 System features:

Works with **transfer film cut sheets** up to 13" wide.

WICS (White Ink Circulation System)
A motor to agitate the white ink in the tank, combined with a separate white ink management system that can be enabled by pressing the switch button to pump the white ink throughout the entire printer system always to guarantee smooth and consistent ink flow.

DTF Sheet Exit Tray
To assist the transfer sheets out of the printer after they have been printed and prevent the paper from getting buckled or snagged by the rollers. It keeps the film sheet from curling and the ink from smearing.

Ink Tank System
(no cartridges needed) for easy, and mess-free refills.

Print speed: up to 10 square ft/hr (~8 A3 pages/hr).

1440 dpi printing resolution

Printer Dimensions
27.8" x 12.7" x 8.5" / 70.5cm x 32.2cm x 21.5cm

Printer Weight
28lbs / 12.7kg
